

GETTING A COVID-19 VACCINE

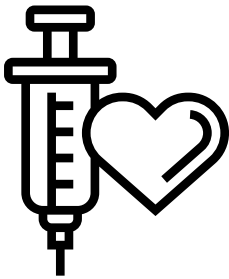

COVID-19 can make people sick and some people can die.

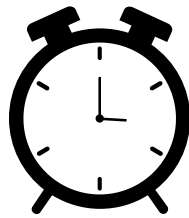

The COVID-19 vaccine (shot) goes into your arm.

You need 2 COVID-19 vaccines (shots), one sooner and one later.

The COVID-19 vaccine can keep you from getting sick.

You can get the vaccine (shot) when it is your turn. Please be patient, it may take some time.

You will most likely go to the clinic or pharmacy to get your vaccine.

You will check in when you arrive and wait for the nurse to call your name.

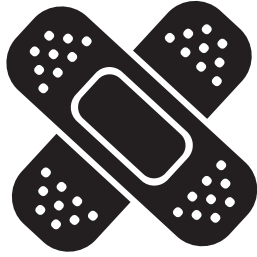

You will roll up your sleeve. The nurse will rub a cold wipe on your arm to clean it.

You will need to sit very still. The nurse will give you the vaccine. It will feel like a pinch or a prick.

GETTING A COVID-19 VACCINE (CONTINUED)

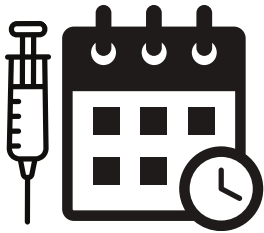

The nurse will put a Band-Aid on your arm.

You will need to sit and wait a few minutes after you get the vaccine.

After the nurse makes sure you are safe and healthy, you can go home.

You will go back in 3-4 weeks to get your second vaccine.

When you go back, you will go through the same steps to get your second vaccine.

After the vaccine, your arm may be sore. Your head may ache and you may feel tired.

It means the vaccine is working. You will feel OK after a couple of days.

You still need to wear a mask when you are around others you do not live with.

You got both doses of the COVID-19 vaccine. You did your part to stay safe and keep others healthy!
